The diagram consists of 10 rows of boxes, each containing a different number of vertical lines. The boxes are arranged in a grid-like pattern, with some rows having a single box and others having multiple boxes. The number of lines in each box varies, with some having 1 line, some having 2 lines, and some having 3 lines. The boxes are arranged in a way that suggests a sequence or a pattern, with some boxes having a '-' sign next to them.

Diagram illustrating the subtraction $12 - 5$ using base ten blocks. A ten rod is broken into two five rods. One five rod is used to subtract from the other five rod, leaving one five rod and two one units.
