(□ . □ . 1.4.6)

4

A collection of 100 small squares arranged in a grid-like pattern. The squares are arranged in rows and columns, with some squares missing, forming a shape that resembles a large '6'. The arrangement is as follows:

- Row 1: 10 squares (1-10)
- Row 2: 10 squares (1-10)
- Row 3: 10 squares (1-10)
- Row 4: 10 squares (1-10)
- Row 5: 10 squares (1-10)
- Row 6: 10 squares (1-10)
- Row 7: 10 squares (1-10)
- Row 8: 10 squares (1-10)
- Row 9: 10 squares (1-10)
- Row 10: 10 squares (1-10)

A number line from 0 to 100 is shown. The numbers 0, 20, 40, 60, 80, and 100 are labeled. Various numbers are marked with blocks: 10 (one block), 20 (two blocks), 30 (three blocks), 40 (four blocks), 50 (five blocks), 60 (six blocks), 70 (seven blocks), 80 (eight blocks), 90 (nine blocks), and 100 (ten blocks). A subtraction problem is shown: $100 - 70 = 30$.

8

□ 10

Diagram illustrating the representation of the number 11 using blocks of different sizes (1, 10, 100, 1000, 10000).

- Row 1: 4 blocks of 10 and 1 block of 100.
- Row 2: 1 block of 1000 and 1 block of 10.
- Row 3: 4 blocks of 10, 2 blocks of 100, and 1 block of 1000.
- Row 4: 1 block of 10000 and 1 block of 1000.

The total value represented is 11.

Diagram illustrating a sequence of numbers (1 to 12) represented by a grid of squares. The grid is 4 rows by 12 columns. The squares are arranged in a pattern that suggests a sequence of numbers. The shaded squares are arranged in a pattern that suggests a sequence of numbers.

13

Diagram illustrating a sequence of 14 blocks, each containing 10 small squares. The blocks are arranged in four rows:

- Row 1: 3 blocks (labeled 1, 2, 3)
- Row 2: 4 blocks (labeled 4, 5, 6, 7)
- Row 3: 3 blocks (labeled 8, 9, 10)
- Row 4: 4 blocks (labeled 11, 12, 13, 14)

The total number of blocks is 14.
