Figure 66.10 (continued) shows the results of the stability analysis for the remaining cases. The results are similar to those shown in Figure 66.10, with the critical buckling load decreasing as the aspect ratio increases. The critical buckling load is 66.10 (Figure 6.66.1).

(4.43)

Figure 67.1 (continued) shows the results of the stability analysis for the remaining cases. The results are similar to those shown in Figure 67.1, with the critical buckling load decreasing as the aspect ratio increases. The critical buckling load is 67.1 (Figure 6.67.1).

67.1 (Figure 6.67.1)

Figure 67.2 (continued) shows the results of the stability analysis for the remaining cases. The results are similar to those shown in Figure 67.2, with the critical buckling load decreasing as the aspect ratio increases. The critical buckling load is 67.2 (Figure 6.67.2).

67.2 (Figure 6.67.2)

Figure 67.2 (continued) shows the results of the stability analysis for the remaining cases. The results are similar to those shown in Figure 67.2, with the critical buckling load decreasing as the aspect ratio increases. The critical buckling load is 67.2 (Figure 6.67.2).
