???? ?????????? ?????????????? ?????? ???????????????

The diagram illustrates a sequence of 15 rows of rectangular blocks, each representing a set of data. The blocks are arranged in a way that suggests a flow or process, with some blocks containing text like '!' and '-'. The blocks are connected by lines, indicating a sequence or relationship between the data sets.

The diagram consists of 12 rows of horizontal bars. Each bar is composed of small rectangular segments. The lengths of the bars vary significantly, with some being very long and others being very short. The bars are arranged in a grid-like pattern, with some rows having bars that are aligned to the left and others having bars that are aligned to the right. The overall pattern suggests a sequence of numbers or a data set where the length of the bar represents a value.
