?? ???? ? ?????

The diagram consists of several rectangles arranged in a sequence. The first row has a long rectangle on the left and a small square in the middle. The second row has a single long rectangle. The third row has a small square on the left. The fourth row has four rectangles of equal length but decreasing width from left to right. The fifth row has a short rectangle on the left, followed by a gap, then the number '2', and another short rectangle on the right.

12

The diagram shows three tens rods and one ten rod with seven ones units attached, totaling 37 units.

19

The diagram shows two rows of base ten blocks. The top row contains two tens rods and eight ones units. The bottom row contains one ten rod and 18 ones units.

Diagram illustrating the assembly of a 110-bit message into a 128-bit frame:

- Message: 110 bits (split into two 56-bit segments).
- First segment (56 bits) is padded with 10 zeros to reach 66 bits.
- Second segment (56 bits) is padded with 10 ones to reach 66 bits.
- The two 66-bit segments are concatenated to form a 132-bit intermediate frame.
- Finally, 6 zeros are added to the end to reach the total frame size of 138 bits.
