???? ?????????? ??????????

The diagram illustrates the construction of a Huffman tree from 14 leaf nodes. The leaf nodes are arranged in four rows: the first row has 7 nodes, the second row has 7 nodes, the third row has 4 nodes, and the fourth row has 6 nodes. The construction process is shown by grouping these nodes into pairs, then into larger internal nodes, until a single root node is formed. The final tree structure is shown on the right, with the root node at the top and leaf nodes at the bottom, labeled with their respective frequencies.
