[illegible]

Diagram illustrating a 6x6 grid of rectangles. The rectangles are arranged in a pattern that suggests a 5x5 grid of larger rectangles, with the bottom-right rectangle missing. The rectangles are labeled with numbers 1 through 25, indicating their position in the grid. The top-left rectangle is labeled 1, and the bottom-right rectangle is labeled 25. The rectangles are arranged in a way that suggests a 5x5 grid of larger rectangles, with the bottom-right rectangle missing.

□ 20□

Diagram illustrating the addition of 100 and 21 using base ten blocks:

- Top row: 100 (represented by 10 tens rods)
- Second row: 21 (represented by 2 tens rods and 1 ones unit)
- Third row: 121 (represented by 12 tens rods and 1 ones unit)
- Bottom row: 121 (represented by 12 tens rods and 1 ones unit, with the number 21 written next to it)

□ 22 □

The diagram consists of 100 small, identical rectangles arranged in a grid-like pattern. The rectangles are organized into 10 rows and 10 columns. The first row contains 10 rectangles, the second row contains 10 rectangles, and so on, up to the tenth row which also contains 10 rectangles. The rectangles are arranged in a way that suggests a sequence or a timeline, with each rectangle representing a single data point or a unit of time.
